

CTFO Slim Racks and Subracks

Safety of cable termination and fibre management are fundamental in telecommunication networks projects. But also small size is a winning key factor for optical engineers. Optotec developed an N2 Standard racks and subracks product line to satisfy those requirements.

CTFO SLIM Rack options are thought to house and support extractable sub-racks and to protect non-equipped seats by painted iron panels. Back upright complete with floor anchorage frame, envelope, cap and lead-in wire for earthing, terminal strip for terminating sheaths and strength members are available.

STFO SLIM Patch and Splice Subracks have painted steel envelope with closing and supporting front panels. Overtunable internal rack is made of aluminium and is suitable for supporting the fibre organizer and for housing fibre storage, optical splices and terminations. The simple and functional design allows to accommodate and manage all types of cables.

Optotec SLIM racks and subracks family is a well consolidated enclosure product, worldwide appreciated by many customers for a very long time.

APPLICATIONS

Central office telecommunication networks

New optical networks implementation

KEY FEATURES AND BENEFITS

Very compact, flexible and functional design

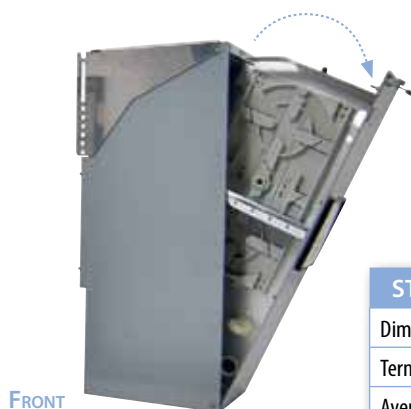

Available with full range of accessories, easy to handle

High mechanical stability and reliability

CTFO PARAMETER	UNIT	22-H4	22-H5	26-H4	26-H5
Dimension (w=120; d=260)	height in mm	2200	2200	2600	2600
Subracks capacity	max	5 H4style	4 H5style	6 H4style	5 H5style
Average Weight	kg	10.8	10.8	12.7	12.7
